

EXPERIMENT NO 6

~ ARYA RAUL

COMPS 20

Aim: Implement character generation: Bitmap method to generate initial characters of your name.

Theory:

Bitmap Method:

- Bitmap method is called dot-matrix method as the name suggests this method uses an array of bits for generating a character. These dots are the points for an array whose size is fixed.
- In bit matrix method when the dots are stored in the form of an array, the value 1 in the array represents the characters i.e. where the dots appear we represent that position with numerical value 1 and the value where dots are not present is represented by 0 in the array.
- It is also called dot matrix because in this method characters are represented by an array of dots in the matrix form. It is a two-dimensional array having columns and rows. A 5x7 array is commonly used to represent characters. However 7x9 and 9x13 arrays are also used. Higher resolution devices such as inkjet printer or laser printer may use character arrays that are over 100x100.

•

Procedure:

- 2D character generators create two-dimensional characters that can be used in a variety of applications, such as video games or animated films.

- 3D character generators create three-dimensional characters that can be used in a variety of applications, such as video games or animated films.

Program:

```
#include<stdio.h>

#include<conio.h>

#include<graphics.h>

#include<dos.h>

void main()

{

int i,j,k,x,y;

int gd=DETECT,gm;

int ch1[][10]={ {0,0,0,1,1,1,1,0,0,0},

{0,0,1,1,1,1,1,1,0,0},

{0,0,1,1,0,0,1,1,0,0},

{0,0,1,1,0,0,1,1,0,0},

{0,1,1,1,1,1,1,1,1,0},

{0,1,1,1,1,1,1,1,1,0},

{0,1,1,1,0,0,1,1,1,0},

{0,1,1,1,0,0,1,1,1,0},

{1,1,1,0,0,0,0,1,1,1},

{1,1,1,0,0,0,0,1,1,1} };

int ch2[][10]={ {0,0,0,1,1,1,1,0,0,0},

{0,0,1,1,1,1,1,1,0,0},

{0,0,1,1,0,0,1,1,0,0},
```

{0,0,1,1,0,0,1,1,0,0},

{0,1,1,1,1,1,1,1,0},

{0,1,1,1,1,1,1,1,0},

{0,1,1,1,0,0,1,1,0},

{0,1,1,1,0,0,1,1,0},

{1,1,1,0,0,0,0,1,1},

{1,1,1,0,0,0,0,1,1} };
